

Using Your Caddy Publication

Using “Bookmarks”

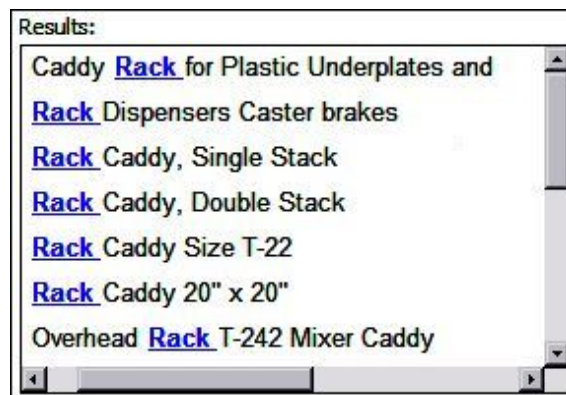

“Bookmarks” are a table of contents with links. Click the Bookmark “tab” on the left of your screen to show them. Then, click on a Page Title and your page instantly appears.

Using “Search”

Click the “Search” button to start. When you enter “rack” in the search box, you are shown a list of links to every instance of “rack” – with added words to give context. Click the link to go directly to your word. Your “Results” stay visible, so if you pick the wrong link, just click a different one.

Printing Your Caddy Publication

Adobe recommends that you set your print quality to the highest setting possible. Lower settings can severely decrease print quality. Please refer to the instructions that came with your printer.
