

# Caddy Architectural Designer Hoods

Tired of the same old unsightly, stainless steel box hanging in your servery or open kitchen? Let Caddy design and build a true showpiece for your front-of-the-house kitchen. Our expert design team will create a unique hood to complement your current or future décor. With thousands of architectural designs, custom finishes, and state-of-the-art lighting we can make your concept a reality. These personalized hoods are great for identifying themed cooking stations as well as showcasing the kitchen itself.

Caddy's custom hoods are not just great looking, but are engineered to provide the same dependable functionality as our standard models. Any standard hood can be redesigned as a custom architectural hood and can even include "green design" with a low air volume system, UVC cleaning, and demand control ventilation. All Caddy Architectural hoods are ETL listed.
