- Water filters with viewing window
- Reverse osmosis set up

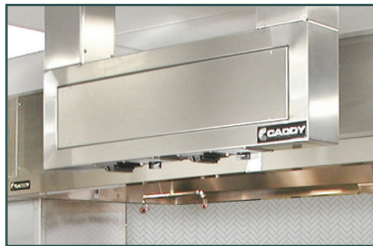

Burying utilities in walls, ceilings and floors is expensive and makes remodeling costs soar. Caddy Utility Distribution Systems provide a single power center for gas, electricity, water and steam. Only one connection is needed for each utility. A UDS can save more than 20% in construction costs and even more when remodeling. Caddy can provide UDS's as a wall mount, island, and ceiling configurations. We also offer power poles that are perfect for prep areas.

UDS plumbing with water filter

Busbar electrical with sinks & fill stations

Ceiling UDS

Internal insulated labels

Labeled quick disconnects

Cook Chill UDS System
