

# Conveyor Refurbishing

enhanced performance at a fraction of replacement cost

# Refurbishment and upgrade of commercial conveyors

*Caddy Corporation partners with forward-looking clients to provide intelligently designed tools for some of the world's smartest kitchens. With over 65 years of conveyor design and manufacturing experience, we provide a cost-effective alternative to replacing your existing conveyor system.*

*Regardless of original manufacturer, you can upgrade to a superior, Caddy-built system today.*

*Intense pre-build client interaction and development insure that our conveyors continue to provide significant returns on investment well into the future.*

*Simplicity of design and attention to detail make Caddy conveyors one of the most sought after components of commercial kitchens world-wide.*

*Solid American-made craftsmanship along with unparalleled 2-year warranties provide reliability and maintenance-free performance. All components are UL- and ETL-Listed.*

## Rebuild vs. Replacement

Like replacement, rebuilds encompass a total rethinking and renovation of existing conveyors, eliminating the inevitable inconvenience and cost of escalating maintenance. But, with cost savings as high as 50% over new installations, rebuilds make more sense from a financial perspective. The advantages don't stop there - rebuilds provide an opportunity to incorporate Caddy-engineered performance enhancements designed specifically for your evolving needs.

Rebuilding allows users to address a host of needs including:

- Increased volume
- Changes in serving style
- Increased use of disposables
- Changing personnel requirements
- Changing configuration needs
- Rising manual labor costs

## Our Unique Approach

Every Caddy conveyor represents an intense partnership between the end-user and our design team. The result is a unique, tailor-made mechanism meeting every challenge provided by the client's unique situation.

In-depth needs assessments, followed by detailed site studies and critical engineering reviews enable us to develop and refine the most comprehensive solution for your specific needs.

Installation services revolve around client schedules to provide minimal intrusion into ongoing operations. We strive to make the refurbishment process as painless as possible.

# A Multitude of Options and Upgrades

**Patented Band System** – Caddy proprietary polyurethane Dura-San textured bands provide the simplest and cleanest conveyor option. Centrally extruded bands with stranded, reinforced cores will not squeak, slip, or crack. Unlike other band systems, Caddy bands eliminate the need for undercounter drip trays.

**Slat Belt System** – Caddy's unique slat belt system incorporates thermoplastic resin snap-connect slats. Our unique monorail system travels above the soiled bed and drip tray, providing increased sanitation and ensuring years of trouble-free operation.

**Skate Wheel and Roller Systems** – Skate wheels with impregnated stainless steel bearings provide easy operation, smooth flow and simple cleaning. Stainless steel or plastic rollers in multiple sizes and configurations can be powered by variable speed motors or gravity driven.

**Trayless System** – These heavy-duty systems exploit the strength and flexibility of Caddy's solid winged belts to satisfy the needs of trayless dining environments. Simply pile soiled dishes, cutlery and trash right on the belt. Great for complicated turn designs. Add our silver deflector for increased efficiency.

**Caddy Star System** – Built on a heavy-duty 3/16" or 1/4" angle frame with tray towers manufactured of fully welded stainless rod – available with an optional anti-jam tray positioning beam. Tray racks are removable for cleaning. Cantilever design (over the scrapping table) allows a smaller footprint and reduces labor.

**Vertical Systems** – Complete multi-floor shaft work and cleaning insures uninterrupted delivery of fresh meals along with automatic return of soiled dishes. Multiple trays can be loaded or unloaded from both sides of the shaft for maximum efficiency.

## Caddy Upgrades–

**Silver Saver** - eliminates the cost of lost cutlery while providing additional employee safety with instant shut off.

**UV Sanitizer** - applies the strongest "C" level lights to effectively sanitize conveyors and reduce waste odors.

**Belt Washer** - thoroughly spray-cleans both top and bottom of the belts through specialized nozzles. Also available with detergent injectors.

**Flat Belt Systems** – We also replace flat belt and banquet systems.
